

Teeny Tree Christmas Card Paper Bow Template & Tutorial

Bow elements:

Pt.1

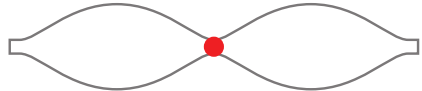

Pt.2

Pt.3

Instructions

1. Print this template onto your chosen coloured paper.
2. Cut each of the bow elements carefully using your scalpel.
3. Take Pt.3 to begin with, and add a dab of glue to the middle (as shown in  ) Alternatively, a small piece of double-sided tape will work.
4. Fold the ends of Pt.3 in towards the middle ( ) Each end should meet in the middle. If you're using glue, you may need to apply pressure and hold in place for a few seconds.
5. Now take Pt.2 and roll into a small loop. Allow each end to overlap slightly and stick together.
6. Glue Pt.3 on top of Pt.1
7. Now carefully stick Pt.2 into place in the centre of Pt.3. Craft tweezers will help to position Pt.1 properly.

Voila! Now you have a super cute teeny tiny bow. Use a small dab of glue, or piece of double-sided tape to place your finished bow above your cut-out Christmas Tree.
